InviZible Pro

Protect your device from dangerous sites, get rid of annoying ads and tracking, get access to blocked resources in your country!

InviZible Pro includes the well known modules DNSCrypt, Tor and Purple I2P. These modules are used to achieve maximum security, privacy and ease of use of the Internet.

InviZible Pro can use root, if your device has root privileges, or uses a local VPN to deliver Internet traffic to Tor, DNSCrypt and I2P networks.

Download and install apk

Install InviZible Pro via F-Droid - https://f-droid.org/en/packages/pan.alexander.tordnscrypt.stable/.

Our dnscrypt server is also part of the official lists for DNSCrypt & DOH Server & Anonymized DNS relays. You can manually change the dnscrypt configuration file in the app if you want to connect to a specific server like ours. Check our dnscrypt installation for the server.
