

WireGuard

WireGuard is a next generation secure network tunnel protocol. This application allows users to connect to WireGuard tunnels. More information may be found on the [project webpage](#).

If your device has a custom kernel containing the WireGuard module, then the module will be used for superior battery life and performance. Otherwise a userspace version will work sufficiently on all other devices.

Download and install apk

WireGuard [isn't available via F-Droid](#) anymore.

Install WireGuard via [F-Droid](#) and add [Izzy's repo](#) to F-Droid under settings.
Or install [WG Tunnel](#).

Click the plus button (bottom right) and select Scan from QR code and follow our [wireguard tutorial](#).
